

GUYANA FORESTRY COMMISSION

**Avoided Deforestation through Consolidation and Creation of Protected Areas and Carbon Financing
Mechanisms in the Guiana Region (Guyana): A KfW/CI/GFC Initiative**

INVITATION FOR BIDS/PROPOSALS

Consultancy Post: Ecosystem Services and Carbon Modeling Specialist

The Government of Guyana has embarked on a national programme that aims to continue to maintain and enhance the protection and sustainable management of Guyana's forest, in an effort to reduce global carbon emissions and at the same time attract resources to foster growth and development along a low carbon emissions path. The initiative will require the development of capacities for monitoring, reporting and verification (MRV) in three areas: forest degradation, exploring reference level setting, and exploring methodological issues in monitoring ecosystem system services.

The Guyana Forestry Commission, on behalf of the Government of Guyana, requires the services of an experienced Ecosystem Services and Carbon Modeling Specialist/Firm to execute the work in the three identified areas.

If your organization/person is interested in bidding for this project, please do the following:

Submit a 5-10 page project proposal to the Guyana Forestry Commission by 11th August, 2011 to:

Mr. James Singh
Commissioner of Forests
Guyana Forestry Commission
1 Water Street, Kingston, Georgetown, Guyana, South America.

Or by email to: Email address: Guyanaforestrycommission@yahoo.com

Full terms of reference, additional background information, required deliverables, and application process for this post are available at www.forestry.gov.gy .
