Global Programme

Clarifications on MRV/M

Targeted support for MRV/M

- Total MRV/M budget: US$6,869,270 (Year 1)

  –Output 1.1: Information and monitoring needs for REDD+

  –Output 1.2: Tools and methods for MRV and Monitoring

  –Output 1.3: Support to country implementation & capacity development

- Targeted support approximately 70%, examples:

  – Institutional capacity development and training on REL/RL, MRV, GHG Inventories, and safeguards information

  – Country specific methodology development

  – Capacity to participate in negotiation processes and make use of the results and guidance, including IPCC

  – Training courses for managing monitoring and information systems

  – National Communications

UN-REDD
PROGRAMME

MRV/M Clarifications

- **Request:** Clarify output 1.2, activity 1.2.1: Training courses in forest and natural resources monitoring
  - More specifically: "This activity is seen as too broad.
  - Which natural resources are included?
  - This activity should be presented to PB7"

UN-REDD
PROGRAMME

Clarification

- **Rationale:** requirements for professionals and decision-makers to manage monitoring and information systems are increasing (growing information needs, awareness of UNFCCC developments, challenges of developing multipurpose systems, etc.)

- **Objective:** knowledge generated by UN-REDD transformed into curricula of courses for executives and technical staff in countries, specifically to:

  - increase awareness of the objectives of monitoring and information systems for REDD+ as defined in the Cancun Agreements, and

  - create capacity for REDD+ monitoring and for managing the monitoring and information systems

UN-REDD
PROGRAMME

MRV/M Clarifications

- **Activity:** 3 courses / year, organized with universities and regional & local training centres. A course was piloted in Tanzania in July 2011 (within the previous GP). Feedback from participants will inform development of future courses

- **Proposal:** reword the activity to better describe the purpose -> *Training courses for managing REDD+ monitoring and information systems*

- **Funding:** US$234,330 (per year)

UN-REDD

PROGRAMME

Editorial changes

- **Request:** move the following activities to output 1.4

  – 1.2.2: Support to CD-REDD process to develop the GHG Inventories (FAO)

  – 1.2.3: Capacity building to assist Non-Annex I Parties in preparing their National Communications and their National GHG Inventory (UNDP)

- **Response:** This was done.

- In addition, to provide more comprehensive package of support to country-level implementation of MRV/M actions, output 1.2: *Education and Capacity Development* was merged with former output 1.4 . This became new output 1.3: *Technical Support to Country-level Implementation and Capacity Development*
